

Hello Airflow — Your First DAG

Hello_airflow.py

```
from airflow.decorators import dag, task
from datetime import datetime

@dag(
    dag_id="hello_airflow",
    schedule="@once",
    start_date=datetime(2024, 1, 1),
    catchup=False,
    tags=["Assignment-1", "hello", "Uday"],
)
def hello_airflow():

    @task()
    def say_hello():
        name="Uday"
        print(f"Hello from Airflow! My name is {name}")

    @task()
    def show_date(**context):
        ds = context['ds']
        print(f"Today's execution date is: {ds}")

    say_hello() >> show_date()

hello_airflow()
```

1. Screenshot 1:

- a. Astro CLI terminal — showing astro dev start completed successfully with 3 containers running

```
● PS D:\KenexAi\Airflow> cd .\Assignment-1\
● PS D:\KenexAi\Airflow\Assignment-1> astro dev start
✓ Project image has been updated
✓ Project started

➤ The default Postgres DB credentials are: postgres:postgres
○ PS D:\KenexAi\Airflow\Assignment-1> █
```

2. Screenshot 2:

Airflow UI DAG list — showing hello_airflow with the toggle switched ON (unpaused)

The screenshot displays the Airflow web interface's DAG list. The left sidebar contains navigation links: Home, DAGs (selected), Assets, Browse, and Admin. The top navigation bar shows 'Dags', 'Dag Runs', and 'Task Instances'. Below this is a search bar and a filter section with tabs for 'All', 'Failed', 'Queued', 'Running', 'Success', and 'Required Actions'. The 'All' tab is active. The main content area shows '1 Dag' and a table with the following data:

Schedule	Latest Run	Next Run
@once		2024-01-01 05:30:00

The DAG 'hello_airflow' is shown with a toggle switch turned ON (unpaused). The interface also includes a 'Sort by Display Name (A-Z)' dropdown and a 'Filter by tag' dropdown.

3. Screenshot 3:

Graph View — both task boxes say_hello and show_date showing GREEN (success)

The screenshot shows the Airflow web interface in Graph View. The DAG 'hello_airflow' is displayed with two tasks: 'say_hello' and 'show_date'. Both tasks are green and labeled 'success'. The right-hand pane shows the logs for the 'say_hello' task, which are empty.

4. Screenshot 4:

Task Log of show_date — showing the execution date printed in the log output

The screenshot shows the Airflow web interface in Task Log View for the 'show_date' task. The DAG 'hello_airflow' is displayed with two tasks: 'say_hello' and 'show_date'. The 'show_date' task is highlighted in blue. The right-hand pane shows the logs for the 'show_date' task, which include the execution date '2026-04-16'.
